

We're **THAMES WATER APPROVED** plumber

We are **GAS SAFE REGISTERED** plumbing, heating, gas engineers

We have electrical **NICEIC contractors** available to you 24 HRS a day

We are new **RATIONAL SELF COOKING CATERING WHITE EFFICIENCY COMBI OVEN,COOKER APPROVED** engineers

We have experienced commercial gas engineers who hold commercial qualification such as commercial gas safety, COCN1, CODNCO1, ICPN1, ICAE1, CORT1, CIGA,1 TPCP1A and we can deal all commercial heating breakdown, commercial boiler repairs, we can connect connect

gas supply to commercial griddle in the restaurant, we can service your commercial boiler yearly and every year we will remind you when your service is due.

## **Commercial Kitchen Canopy Services**

-Canopies are designed to remove harmful fumes (carbon monoxide gasses) & the removal of heat & grease generated from cooking equipment situated below.

- Regular cleaning of your extraction system is recommended. There should be suitable access to the ductwork to allow for regular cleaning preventing accumulation of fat & grease. If regular cleaning isn't monitored hidden combustion loads form. Also flames or very high temperatures within the duct can ignite any grease causing a fire.

## **KITCHEN CANOPY FILTERS**

Mesh filters require regular washing & as a consequence are less reliable & can be regularly replaced.

Baffle filters are safer & are less of a fire risk because they are designed not to hold on to any fat or grease. Air is drawn through the filter forcing a change of direction & speed resulting in separation of grease into collection troughs.

## **GAS AIR INTERLOCKS**

All extraction systems must have a gas interlocking system in place to comply with BS6176 & should be installed by a CORGI registered engineer. This prevents the gas from being turned

on until ventilation is fully operational.

Interlock systems such as the Merlin CT1200S use an air pressure sensor which detects when the canopy is working correctly with sufficient air flow. Once this is achieved the gas solenoid valve will open from a closed position
