

24HR Commercial Appliance Services is an approved plumber for [Thames Water](#) . Under Regulation 6, of the Water Supply (Water Fittings) Regulations 1999, the approved contractor is required to issue a certificate of compliance. We are registered under the guidance and supervision of the Thames Water Approved Plumbing Scheme (TAPS).

We hold this qualification and we can help you when you need to have either or commercial and domestic plumbing installation certificate done for your properties

Water Regulations Domestic Installation – TAPS Certificate Required

The Water Supply (Water Fittings) Regulations 1999, set requirements for the design, installation and maintenance of plumbing systems and water fittings. The Department of Environment, Food and Rural Affairs (Defra) allows organisations such as Thames Water to run an approval scheme, which enables plumbers or contractors to self-certificate their own work. This negates the need for a separate regulations inspection to be carried out by water companies who have a duty to enforce the regulations.

There are currently four types of certificates:

TAPS 3 Certificate

For internal work in new properties and can be only issued by an approved plumber.

TAPS 4 Certificate

For internal work in existing properties that require no new connections or upgrades of supply size from Thames Water. This can only be issued by an approved plumber.

TAPS 5 Certificate

For underground supply pipes from an outside stop valve or boundary to an inside stop valve. Either an approved plumber or underground worker can issue this.

TAPS 6 Certificate

For notification work. This is issued by an approved plumber and is followed up by a TAPS 4 certificate once the work is complete.

Other Commercial & Domestic Plumbing Areas we can offer :

Commercial Plumbers – Plumbing Services
