

Lead Pipe Replacement

Why you should replace your old lead pipes ?

- There may be lead present in your drinking water supply.
- Lead can build up in the body and can be harmful, especially to infants and children who may be more at risk
- Studies have shown that to some extent lead can have an effect on the mental development of children, and has been associated with behavioral problems.
- It is recommended that you avoid excessive exposure from any source, including keeping lead levels in water as low as possible.
- The current interim standard for lead in drinking water is 25 µg/l, this is being dramatically tightened to 10 µg/l in the next few years providing a greater margin of safety.

Our Services – emergency moling

Moling- trenchless installation of underground pipes, ducts and cables

Any construction work at your property can be a stressful experience - At Advance Leak Detection, our first priority is to ensure minimal inconvenience and disruption to you and your home or business. Moling is just one method we employ to achieve this.

What is moling?

Moling is a soil displacement technique used for underground pipe installations. A compact pneumatic device drives new or replacement pipes through the soil with minimal disturbance at ground level and is ideal for use under driveways, roads, paths, patios, parks and golf courses, for example.

It is a cost effective alternative to the 'open cut', or 'continuous trench', method traditionally used in sub surface ground works.

Advantages

- Minimal surface disruption/ reduced reinstatement costs.
- Faster and in many cases lower overall costs.

- Bypasses surface obstacles leaving driveways and paths undisturbed.
- Reduced interruption to traffic.

How does it work?

Driven by compressed air, a soil displacement hammer (the mole) forces its way through the ground compacting and displacing the soil rather than removing it. In most cases, two pits are excavated, one to launch the mole and one to receive it. After the immediate area is checked for underground services that may cause an obstruction, the mole is accurately positioned in to travel a pre-set path through the soil from the launch pit. The action of the mole creates a cavity underground, through which the pipe is pulled, and emerges in the reception pit. This method can be used in most ground conditions including soil, clay and rock.

Our Services - Water Leak Location and Repair

Do you have a leak?

Leaks may be easily discovered by disruption at the ground surface, but not all leaks are obvious and you may have received notification from your water supplier of a Customer Side Leak (CSL) on your property.

Who is responsible?

It is the legal responsibility of the property owner to carry out adequate repairs. Acting quickly could save you money, reduce inconvenience and minimise damage

Examples of Emergency Moling Services / 24 HR Moiler

- External Drain Jetting Service to clear bad blockages
water pipe repair

- Underground

- Lead pipe replacement
water pipe repair

- Emergency

- Commercial pipe water leak
leaking pipes

- Emergency

- Emergency commercial leaking pipe
leak detection services

- Commercial

- Emergency moling engineer leak detection
lead pipe repair plumber

- Emergency

- Emergency leaking pipe repair
pipe repairs

- 24HR water

- Emergency commercial plumbing services
water pipe detector

- 24 Hours

- Pipe leak emergency repair
pipe stop a leaking pipe

- Repair plumbing

- Pipe leak repair, Fixing leaking pipes
leak repairs

- 24HR water

- Leak detectors, Water leak repair water pipe replacement - Underground
- Underground water pipe moling engineer pipe - Leaking water
- Water pipe detection domestic plumbing pipes replacement experts - Commercial and
- Emergency leak detection specialists pipe - Repair leaking
- Water pipe replacement, leak repair leak detection systems - Plumbing repair,
- Drain pipe repairs, pipe leak detection specialist Emergency Moling engineer - 24/7
