

We're **THAMES WATER APPROVED** plumber

We are **GAS SAFE REGISTERED** plumbing, heating, gas engineers

We have electrical **NICEIC contractors** available to you 24 HOURS a day

We are new **RATIONAL SELF COOKING CATERING WHITE EFFICIENCY COMBI OVEN, COOKER APPROVED** engineers

Get to know what “Moiling” is

Advance technology moling service is an ideal trenchless technique for straightforward pipe, cable and ducting with a diameter between 25mm and 150mm, and up to about 30m in length.

Furthermore, impact moling plant and equipment is compact and ideal for sites where space is confined or restricted. With impact moling, operational and environmental disruption is minimal.

A 'mole' is a torpedo-shaped pneumatic device which drives through soil using a percussive or hammer effect. The pipe or duct is usually drawn in behind the mole.

Impact moling works in straight lines – unlike horizontal directional drilling which can be guided – and requires both a launch pit and a reception pit. In the launch pit, the mole is lined up with the catch pit and then set in motion.

Impact moling has many applications including the renewal of lead water pipes, the installation of utility pipework, and cable laying.

We use trenchless technology, particularly Impact Moling. We have helped a number of domestic and commercial customers in London and Kent to repair and renew underground pipes, ducts and cables using techniques that minimise or eliminate the need for excavation.

We provide a cost effective alternative to traditional open cut methods of installation, renewal and repair. Our services can also help you to reduce the impact on the environment.

The advantages of impact moling for you are;

- Installations of water mains, underground services
- More cost effective than traditional trenching methods
- Minimal / no excavation beyond necessary launch pits or termination points for the installed service
- Minimal disruption to the customer's property

- Environmentally and socially beneficial

Installation times vary dependent on soil conditions. Typical bore sizes are in the range of 20mm up to 32 mm in diameter.

We handle all aspects of the excavation side of your business, minimising the additional cost and effort for you, and leaving you free to concentrate on the job in hand.

Examples of Emergency Moling Services / 24 HR Moiler

- | | |
|--|---------------|
| - External Drain Jetting Service to clear bad blockages
water pipe repair | - Underground |
| - Lead pipe replacement
water pipe repair | - Emergency |
| - Commercial pipe water leak
leaking pipes | - Emergency |
| - Emergency commercial leaking pipe
leak detection services | - Commercial |
| - Emergency moling engineer leak detection
lead pipe repair plumber | - Emergency |

- Emergency leaking pipe repair
pipe repairs

- 24HR water

- Emergency commercial plumbing services
water pipe detector

- 24 Hours

- Pipe leak emergency repair
pipe stop a leaking pipe

- Repair plumbing

- Pipe leak repair, Fixing leaking pipes
leak repairs

- 24HR water

- Leak detectors, Water leak repair
water pipe replacement

- Underground

- Underground water pipe moling engineer
pipe

- Leaking water

- Water pipe detection
domestic plumbing pipes replacement experts

- Commercial and

- Emergency leak detection specialists
pipe

- Repair leaking

- Water pipe replacement, leak repair
leak detection systems

- Plumbing repair,

- Drain pipe repairs, pipe leak detection specialist

- 24/7
