

At 24HR commercial appliance services we have extensive experience in the commissioning and decommissioning of commercial gas pipework and the associated pipework purging services required. We have an enviable record of completed commercial gas projects large and small, and we can carry out comprehensive gas testing and purging of commercial gas pipework throughout London and surrounding areas. We have Gas Engineers trained to deal with all aspects of commercial gas pipework purging whether on new build, refurbishment or decommissioning.

In IGE/UP/1 and IGE/UP/1A (Strength Testing, Tightness Testing and Direct Purging of Industrial and Commercial Gas Installations), The Institution of Gas Engineers and Managers (IGEM) has laid out clear principles which must be observed whenever a gas supply is to be commissioned or decommissioned, whether a new or an existing installation is involved. The person making the supply available must ensure that all air and gas, other than the gas to be supplied, is purged from the installation.

Emergency Commercial Gas Pipe Tightness Testing all 24 Hours throughout festive periods

Tightness testing is carried out to ensure that your gas pipework is safe for use. In a new gas pipework installation the test is to verify that pipework is gas tight.

On existing gas pipework installations, the test is to confirm that the pipework is gas tight.

A smell of gas or presence of gas detected would fail the test and would be required to be traced and repaired which ABC can also attend to.

We recommend that all gas pipework be tested on an annual basis. This can be carried out at the same time as the annual gas appliance service visit.

We also undertake all other gas services including new installations of central heating systems, planned preventative maintenance and also repairs of boilers, both domestic and commercial.
