

We're **THAMES WATER APPROVED** plumber

We are **GAS SAFE REGISTERED** plumbing, heating, gas engineers

We have electrical **NICEIC contractors** available to you 24 HOURS a day

We are new **RATIONAL SELF COOKING CATERING WHITE EFFICIENCY COMBI OVEN, COOKER APPROVED** engineers

Our Services – emergency moling

Moling- trenchless installation of underground pipes, ducts and cables

Any construction work at your property can be a stressful experience - At Advance Leak Detection, our first priority is to ensure minimal inconvenience and disruption to you and your home or business. Moling is just one method we employ to achieve this.

What is moling?

Moling is a soil displacement technique used for underground pipe installations. A compact

pneumatic device drives new or replacement pipes through the soil with minimal disturbance at ground level and is ideal for use under driveways, roads, paths, patios, parks and golf courses, for example.

It is a cost effective alternative to the 'open cut', or 'continuous trench', method traditionally used in sub surface ground works.

Advantages

- Minimal surface disruption/ reduced reinstatement costs.
- Faster and in many cases lower overall costs.
- Bypasses surface obstacles leaving driveways and paths undisturbed.
- Reduced interruption to traffic.

How does it work?

Driven by compressed air, a soil displacement hammer (the mole) forces its way through the ground compacting and displacing the soil rather than removing it. In most cases, two pits are excavated, one to launch the mole and one to receive it. After the immediate area is checked for

underground services that may cause an obstruction, the mole is accurately positioned in to travel a pre-set path through the soil from the launch pit. The action of the mole creates a cavity underground, through which the pipe is pulled, and emerges in the reception pit. This method can be used in most ground conditions including soil, clay and rock.

Our Services - Water Leak Location and Repair

Do you have a leak?

Leaks may be easily discovered by disruption at the ground surface, but not all leaks are obvious and you may have received notification from your water supplier of a Customer Side Leak (CSL) on your property.

Who is responsible?

It is the legal responsibility of the property owner to carry out adequate repairs. Acting quickly could save you money, reduce inconvenience and minimise damages.

Examples of Emergency Moling Services / 24 HR Moiler

- External Drain Jetting Service to clear bad blockages
water pipe repair

- Underground

- Lead pipe replacement
water pipe repair

- Emergency

- Commercial pipe water leak
leaking pipes

- Emergency

- Emergency commercial leaking pipe
leak detection services

- Commercial

- Emergency moling engineer leak detection
lead pipe repair plumber

- Emergency

- Emergency leaking pipe repair
pipe repairs

- 24HR water

- Leak detectors, Water leak repair
water pipe replacement

- Underground

- Underground water pipe moling engineer
pipe

- Leaking water

- Water pipe detection
domestic plumbing pipes replacement experts

- Commercial and

- Emergency leak detection specialists
pipe

- Repair leaking

- Water pipe replacement, leak repair
leak detection systems

- Plumbing repair,

- Drain pipe repairs, pipe leak detection specialist
Emergency Moling engineer

- 24/7

-Replacement of water main pipes
water supply and main pipes

- Repairs of

- Underground pipe work, Pipe Duct Installation
detection and pipe tracing

- Leakage
